Classify Text as Stressed vs. Normal Using LSTM

RESULTS ON THE HELD-OUT TEST SET

Accuracy	Precision	Recall	F1-score
92.59%	91.37%	94.07%	92.70%

Precision, recall and F1-score use stressed (1) as the positive class.
Test set: 270 posts (135 per class). Correct predictions: 250/270. Threshold: 0.5.

LSTM Confusion Matrix

		Predicted label	
		Normal (0)	**Stressed (1)**
Actual label	**Normal (0)**	**123**	**12**
	Stressed (1)	**8**	**127**

Held-out test set: 270 posts

CLASS-WISE METRICS

Class	Precision	Recall	F1-score	Support
Normal	93.89%	91.11%	92.48%	135
Stressed	91.37%	94.07%	92.70%	135
Macro Avg	**92.63%**	**92.59%**	**92.59%**	**270**

Data: 1,800 original posts; 1,796 after duplicate/conflicting-label cleanup.
Split: 1,257 train / 269 validation / 270 test. Seed: 42. Best epoch: 4.
Recorded TensorFlow 2.20.0 CPU run; results may vary slightly across environments.
